DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Craig in view of admitted prior art (APA). Applicant states that power knives with multiple blades are old in the background section. The claim calls for such a knife with detachable handle. Craig shows a detachable handle for a sliding blade utility knife. The grip offers the operator more control and force applying ability. Obviously one of ordinary skill in the art would add such a grip to the APA device to give the operator a means to increase the operability of the APA device.

Allowable Subject Matter

Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
